

NORTH PHILADELPHIA
HEALTH SYSTEM
We care for the community.

Dear Mr. Chairman,

We have been made aware that the FCC is considering revisions in the Universal Service Fund (USF) contribution methodology that, according to our review, could have an adverse impact on our organization's ability to maintain patient safety and emergency response standards. It is our understanding that certain components of these revisions, if applied to paging services, would lead to significantly increased costs as the carriers will seek to pass through those costs to their customers.

Our organization relies heavily on paging services for hospital communications ranging from emergency response, code team alerting (i.e. code blue), security, nursing and numerous other patient-related communications. Today, we pay less than 10 cents per month in USF charges for each pager, and often less than 5 cents. Replacing these revenue-based charges with a flat \$1.00 charge would dramatically raise our costs (by as much as 30% overall) for these services, causing our organization to revisit its use of the services. At a time when our budgets are already stretched and in an uncertain economy, this is not a welcome surprise.

As a result of the increased costs, we will be forced to re-evaluate our communication strategy. These revisions will likely lead us to reduce our communications usage in order to offset the increased costs. As a result, we feel that patient safety, security and emergency response could be adversely impacted.

We are in the business of providing services to the public. We understand the USF goals are also aligned with the public interest as the USF helps defray the cost of telephone service in rural areas and for low-income consumers as well as provides subsidies to schools, libraries, and rural health clinics. However, we feel these revisions will run counter to the interests of the public. Therefore we urge you to reconsider the changes taking into account the adverse impact they may cause in the healthcare community.

Sincerely,

Timothy Costello
Telecommunications Manager

Dear Mr. Chairman,

Santee Cooper has been made aware that the FCC is considering revisions in the Universal Service Fund (USF) contribution methodology that, according to our review, may have an adverse impact on our organization's ability to maintain emergency response standards. It is our understanding that certain components of these revisions, if applied to paging services, would lead to significantly increased costs as the carriers will pass through those costs to their customers.

Santee Cooper relies heavily on paging services for communicating to our staff in the field. Today, we pay 11 cents per month in USF charges for each pager. Santee Cooper currently has 1,146 pagers. Replacing these revenue-based charges with a flat \$1.00 charge would dramatically raise our costs for these services, causing our organization to revisit its use of the services. At a time when budgets are already stretched and in an uncertain economy, this is not a welcome surprise.

As a result of the increased costs we, or our communication partners, will be forced to re-evaluate our communication strategy. These revisions will likely lead us to reduce our communications usage in order to offset the increased costs.

We are a state owned electric utility company. We understand the USF goals are also aligned with the public interest as the USF helps defray the cost of telephone service in rural areas and for low-income consumers as well as provides subsidies to schools, libraries, and rural health clinics. However, we feel these revisions will run counter to the interests of the public. Therefore, we urge you to reconsider the changes taking into the account the adverse impact they may cause for our customers that we serve.

Sincerely,

Rick Jarrell
Manager, Information Technology

As a result of the increased costs, we will be forced to re-evaluate our communication strategy. These revisions will likely lead us to reduce our communications usage in order to offset the increased costs. As a result, we feel that patient safety, security and emergency response could be adversely impacted.

We are in the business of providing services to the public. We understand the USF goals are also aligned with the public interest as the USF helps defray the cost of telephone service in rural areas and for low-income consumers as well as provides subsidies to schools, libraries, and rural health clinics. However, we feel these revisions will run counter to the interests of the public. Therefore we urge you to reconsider the changes taking into account the adverse impact they may cause in the healthcare community.

Sincerely,

John Bratcher
Executive Director

A member of CHS

Dear Mr. Chairman,

We have been made aware that the FCC is considering revisions in the Universal Service Fund (USF) contribution methodology that, according to our review, could have an adverse impact on our organization's ability to maintain patient safety and emergency response standards. It is our understanding that certain components of these revisions, if applied to paging services, would lead to significantly increased costs as the carriers will seek to pass through those costs to their customers.

Our organization relies heavily on paging services for hospital communications ranging from emergency response, code team alerting (i.e. code blue), security, nursing and numerous other patient-related communications. Today, we pay less than 10 cents per month in USF charges for each pager, and often less than 5 cents. Replacing these revenue-based charges with a flat \$1.00 charge would dramatically raise our costs (by as much as 30% overall) for these services, causing our organization to revisit its use of the services. At a time when our budgets are already stretched and in an uncertain economy, this is not a welcome surprise.

As a result of the increased costs, we will be forced to re-evaluate our communication strategy. These revisions will likely lead us to reduce our communications usage in order to offset the increased costs. As a result, we feel that patient safety, security and emergency response could be adversely impacted.

We are in the business of providing services to the public. Dear Mr. Chairman,

We have been made aware that the FCC is considering revisions in the Universal Service Fund (USF) contribution methodology that, according to our review, may have an adverse impact on our organization's ability to maintain emergency response standards. It is our understanding that certain components of these revisions, if applied to paging services, would lead to significantly increased costs as the carriers will pass through those costs to their customers.

Our organization relies heavily on paging services for our emergency response and public safety communications. Today, we pay less than 10 cents per month in USF charges for each pager, and often less than 5 cents. Replacing these revenue-based charges with a flat \$1.00 charge would dramatically raise our costs (by as much as 30% overall) for these services, causing our organization to revisit its use of the services. At a time when budgets are already stretched and in an uncertain economy, this is not a welcome surprise.

As a result of the increased costs we, or our communication partners, will be forced to re-evaluate our communication strategy. These revisions will likely lead us to reduce our communications usage in order to offset the increased costs. As a result, we feel that public safety and interoperability could be adversely impacted.

We are in the business of public safety. We understand the USF goals are also aligned with the public interest as the USF helps defray the cost of telephone service in rural areas and for low-income consumers as well as provides subsidies to schools, libraries, and rural health clinics. However, we feel these revisions will run counter to the interests of the public. Therefore we urge you to reconsider the changes taking into account the adverse impact they may cause for public safety issues.

Sincerely,
